

CHILD SUPPORT **GUIDELINES AND WORKSHEET**

A VERY EASY way to calculate child support is to use the internet by clicking on the following link:
http://www.nmcourts.com/cgi/prose_lib/

This online program quickly produces a worksheet. REMEMBER, before you go online, have all the financial information, time your child will spend with each parent, special expenses, etc. at your side to input into the program. If you find you do not have all the information required, you can exit the program and return at another time.

Once you complete the online program, the program allows you to print the child support worksheet which you attach to your Child Support Obligation Plan.
